STRAWBERRY PLANTS

IMPROVED EXTRA HARDY EARLY SENATOR

DUNLAP—Bi-sexual, Male, Extra early to mid-season. Plants are healthy, fast growers and make runners freely. Will withstand much dry weather, more so than most other varieties. This is the one variety upon which, with ordinary soil and care, you can depend for a full crop of fruit next season. An ideal berry for the home garden and market. Will produce when others fail. Berries medium to large, dark red to centre, splendid flavor. One of the better varieties for canning. It does not lose its color. Our strain is the genuine Extra Hardy Early Senator Dunlap. Improved by years of plant selection. Thousand, \$4.00. Three thousand, \$10.00. Five thousand, \$15.00.

GLEN MARY. An old standard and one of the leading commercial varieties today. Strong vigorous healthy plant-maker. A heavy producer of firm extra large berries. Bi-sexual mid-season to late. Does well on the heavier soils. A good shipper. Thousand, \$4.00. Three thousand, \$10.00. Five thousand, \$15.00.

DR. BURRILL. Also known as The Million Dollar Strawberry. Bi-sexual, male mid-season. As a dry weather producer it cannot be beaten. Fine flavor and a favorite on any market. A heavy yielder under fair conditions. Berries a rich red, firm enough for shipping. Delicious for table use. A long season berry. Can be grown on any berry soil. A variety that will still be producing crops when many of the newer varieties are forgotten. Thousand, \$4.00. Three thousand, \$10.00. Five thousand, \$15.00.

BLAKEMORE. A new variety sent out by the U.S.D.A. No. 659. Berries bright red, tough skin, very firm flesh, mild flavor. An extra good keeper, either on the vines or picked. Plants make runners freely. A strong hardy grower. Berries very uniform in size. Medium to large. Very early. A wonderful market berry. One of the better new varieties. Thousand, \$4.00. Three thousand, \$10.00. Five thousand, \$15.00.

ST. LAWRENCE BEAUTY. Bi-sexual, male, early. Selected in 1925 as a sport in a field of Senator Dunlap. It is a medium to large bright red berry of excellent quality both for the table and preserving. The plants are large and should be planted at least 24 inches in the row. Select plants, introducers original strain. Reduced prices this season. One hundred, \$1.00. One thousand, \$8.00. Two thousand, \$15.00.

PREMIER. Direct from imported plants. Extra early. Medium red. Very uniform, large size. Choice flavor. Almost frost proof, strong, healthy foliage. One of the better sorts.

Thousand, \$5.00. Three thousand, \$13.00. Five thousand, \$20.00.

SURPLUS STOCK. Planters who are not particular about varieties will find these plants a real bargain. Please do not ask for any certain kind as these orders are filled with plants of which I have a surplus. Not less than one thousand plants supplied at this price. \$3.00 per thousand. Quality guaranteed.

Strawberry Culture

WHY GROW STRAWBERRIES? Strawberries are one of the most profitable crops grown. The profit you may expect is high in comparison with any other crop. It is the first fruit harvested in the season. Little money is needed to start a strawberry garden.

TIME TO PLANT—Early spring is the logical, natural, and proven the most successful and satisfactory time to set strawberry plants. If you want strawberries next season, do not neglect to set your plants this spring.

FALL PLANTING—Do not depend on late planting as, even if the plants live, they will not be a success. It cannot be done.

WHERE TO PLANT—Any soil that grows a good crop of vegetables, should give good results with berries.

SETTING THE PLANTS. Set plants with roots straight down, the crown even with the ground surface and the soil packed firmly against the roots. **PACKING FIRMLY** is very important.

DISTANCE TO PLANT. We advise making your rows $3\frac{1}{2}$ to 5 feet apart and spacing the plants from 12 to 18 inches apart in the row.

MANURE AND FERTILIZER—Barnyard manure is the best fertilizer for strawberries. Where re-

quired 500 to 700 pounds of superphosphate to the acre, is perhaps the better and cheapest commercial fertilizer to use.

MATING OF VARIETIES. All varieties sold by us are perfect flowering, male, staminate or bi-sexual and do not need mating or other varieties planted with them to produce a crop of perfect fruit.

REMOVING BLOSSOMS. Blossoms should be removed from newly set plants, as soon as they appear. To allow berries to mature involves a severe drain on the vitality of the plant, before its root system is established. Removing blossoms should never be neglected.

MULCHING. A light mulch of strawy manure, leaves evergreens or any coarse material can be applied as soon as the ground is frozen.

Our plants are grown for plants only. The whole row is dug, graded, cleaned and counted.

When you buy our Extra Hardy Northern Grown plants you get the benefit of over thirty years' experience and plant selection.

QUALITY GUARANTEE:—All orders must be given and can be accepted on the following conditions only: "I, Leonard W. Barkley, do hereby guarantee to the best of my knowledge, that all plants when shipped are free from disease or insects, true to name, freshly dug and full count. That they are packed and delivered to the carrier in the best possible condition. After delivery to the carrier the plants are beyond my control, and I cannot be in any way responsible for the crop. Most of the failures with nursery stock are due to causes entirely beyond the control of the seller. I use every possible care to ship only such stock as will under proper conditions give satisfactory results. Examine your plants at the express office and if for any reason whatever, they are not satisfactory, return them PREPAID, and your remittance will be returned without question."

TERMS OF SALE. It is only by doing a cash business that we are able to offer plants at the prices asked. Wholesale prices are for plants sent by express, delivery charges collect at destination. We find express the better way to ship.

REFERENCES. Customers who have grown our plants or Express Agent at Morrisburg.

I have been growing plants for the trade since 1905 and would be pleased to fill your orders this season.
